- Lesson 1: What is HTML
- Lesson 2: What is HTML Follow Along Guide
- Lesson 3: HTML vs Programming languages
- Lesson 4: Creating an HTML file using notepad ++
- Lesson 5: How to use tag
- Lesson 6: What are the attributes
- Lesson 7: Literally working on HTML document
- Lesson 8: HTML document hierarchy rules
- Lesson 9: Making the HTML document readable
- Lesson 10: White spaces and preformatted text
- Lesson 11: Styling and formatting text using some HTML tags
- Lesson 12: Abbr tag and Title attribute
- Lesson 13: HTML Entities

#### Module 2: HTML Lists

- Lesson 1: Unordered lists
- Lesson 2: Ordered Lists
- Lesson 3: Type and value attribute for formatting HTML Lists
- Lesson 4: Nesting multiple lists
- Lesson 5: Making description

#### Module 3: HTML Tables

- Lesson 1: Building tables
- Lesson 2: Table heading
- Lesson 3: Managing table height and width
- Lesson 4: Using colspan attribute
- Lesson 5: Using rowspan attribute
- Lesson 6: Nested Tables
- Lesson 7: Cell spacing and Cell padding
- Lesson 8: Creating a complete website layout using tables

#### Module 4: URLs, Links and iframing

- Lesson 1: Understanding URL and its parts
- Lesson 2: Linking a webpage to another webpage
- Lesson 3: Linking to an HTML file which is on a sub directory

- Lesson 4: Linking a webpage to a back directory's HTML file
- Lesson 5: Bookmarking
- Lesson 6: Target Attribute
- Lesson 7: Linking all the pages and making a linked and navigated website
- Lesson 8: Iframes
- Lesson 9: Creating navigation page and adding it on all pages using iframe tag

## **Module 5: HTML and Images**

- Lesson 1: Adding Images
- Lesson 2: Adding Inline Images
- Lesson 3: Linking up images with webpages and other images
- Lesson 4: Title and Alt attribute
- Lesson 5: Course Feedback Checkpoint - How Are You Enjoying Our Course So Far?

## **Module 6: Intro to CSS and some basics**

- Lesson 1: What is CSS
- Lesson 2: Inline CSS
- Lesson 3: Internal CSS
- Lesson 4: External CSS
- Lesson 5: The Div Tag

## **Module 7: CSS Selectors**

- Lesson 1: Different states of anchor tag
- Lesson 2: Sibling and Child selector of CSS

## **Module 8: CSS Dimensions**

- Lesson 1: Height and width properties
- Lesson 2: Pixels and Percents
- Lesson 3: Margination
- Lesson 4: Padding
- Lesson 5: Important rules of dimension

## **Module 9: CSS Box model**

- Lesson 1: CSS borders
- Lesson 2: Expanded way of CSS borders
- Lesson 3: CSS Backgrounds
- Lesson 4: Floating and clearing

## **Module 10: CSS Lists, Text & Fonts and Tables**

- Lesson 1: CSS Lists
- Lesson 2: Adding Images to CSS lists
- Lesson 3: Creating a simple navigation bar using CSS lists
- Lesson 4: CSS text
- Lesson 5: CSS fonts
- Lesson 6: CSS tables

## **Lab / Exercises**

- During the course participants are encouraged to actively participate in the learning experience by running example files during lectures and performing coding challenges during labs
- Each lab session allows you to compare your solution to the instructor's

### **Documentation**

- Digital courseware included

### **Participant profiles**

- Web developers who need to implement Web-based solutions and work in a HTML document environment
- Webmasters who want working knowledge of HTML to create and maintain Web sites
- Project managers who must have a basic understanding of what is possible to accomplish with HTML and related technologies

### **Prerequisites**

- A basic familiarity with PC's and Windows
- A basic understanding of how the Internet works

### **Objectives**

- Be familiar with the building blocks of the HTML 5 markup language and
- Understand how to design and layout Web pages
- Create tables and lists
- Understand how to develop Web pages and forms
- Have a working knowledge of Cascading Style Sheets 3 and the formatting power they can bring to your Web pages
