ISO/IEC 27002 Foundation

Description

Why enroll in the ISO/IEC 27002 Foundation course?

Information security has become a top priority for companies aiming to protect their sensitive data. The ISO/IEC 27002 Foundation course provides the keys to understanding best practices in IT security, based on the ISO 27002 standard. You will learn how to implement concrete measures to ensure information security while exploring the correlations with other ISO standards. This training not only helps you gain essential skills but also prepares you for the official PECB certification exam. Whether you are a consultant, manager, or security professional, this course offers a solid foundation to manage information security risks effectively.

Earn your ISO/IEC 27002 Foundation certification

By taking the ISO/IEC 27002 Foundation course, you will develop expertise in implementing information security measures. This internationally recognized training is essential for those who wish to master the requirements of the ISO 27002 standard. Additionally, you will be able to sit for the PECB-certified exam to validate your knowledge and boost your career in cybersecurity. By the end of the course, you will have all the necessary skills to apply these best practices within your organization.
