

Implementing and Managing Windows 11

Description

This 4-day training is developed by the Microsoft Community and replace the retired Microsoft course: Implementing and Managing Windows 10 (MOC 20697).

It is designed to provide you with the knowledge and skills required to install and configure Windows 11 desktops and devices in an on-premises Windows Server Active Directory domain environment. This course is also backwards compatible with Windows 10 as many of the technologies and principles remain the same.

Niveau

Intermédiaire

Course Content

Module 1: Installing Windows 11

- Introducing Windows 11
- Installing Windows 11

Module 2: Upgrading and updating Windows 11

- Upgrading to Windows 11
- Migrating user state
- Managing Windows 11 updates

Module 3: Configuring Windows 11 devices

- Local configuration tools in Windows 11
- Using Windows Admin Center
- Using Windows PowerShell
- Implementing Remote Management

Module 4: Configuring network connectivity

- Configuring network connectivity
- Implementing name resolution
- Implementing remote access
