

PRINCE2 Agile® Practitioner

Description

PRINCE2 Agile® Practitioner Training: An Agile Approach to Project Management

The PRINCE2 Agile® Practitioner training enables you to integrate the rigorous principles of PRINCE2® with the flexibility of Agile methods. Through this course, you will learn how to effectively adapt PRINCE2® processes and themes to dynamic environments, while optimizing your project's performance in key areas such as time, budget, and quality. This course provides a comprehensive view of project management, equipping you with the tools to combine both Agile and traditional approaches while meeting your deliverable requirements.

Course Content

Module 1: Overview of Agile

- Discover the main aspects of the agile ways of working (including the Agile Manifesto)

Module 2: Overview PRINCE2® and Agile blending

- Understand the purpose and the context for combining PRINCE2® and agile ways of working
- Why and how flex the 6 aspects of performance of a project (time, cost, scope, quality, risks, benefits)

Module 3: Stating Up a project and Initiating a project

- Determine what needs to be adapted at PRINCE2® level, how and to which extend
- Focus on outcomes rather than on outputs
- Define epics and releases

Module 4: Organisation, roles and responsibilities

- Embed PRINCE2® and Agile roles to ensure a good communication, delegation, decision-making, and delivery

Module 5: Using Agile

- Evaluate to which extent project's context is ready to apply agile ways of working

Module 6: Scrum

- Introduction to the Scrum agile framework

Module 7: Plan, Progress and Quality

- Develop and evaluate (grooming) the Product Backlog
- How to monitor progress and to communicate current status
- Manage quality (user stories, definition of "done")

Module 8: Controlling a stage, Managing stage boundaries, Directing a project and Closing a project

- Determine how to deal with PRINCE2® execution and control processes
- Frequent releases, review, retrospective

Module 9: Kanban method and Lean Start-up

- Introduction to the Kanban Method and to the Lean Start-up agile framework
- Preparation for the examination

Lab / Exercises

Based on a case study:

- Exercise 1: For you, what is agile?
- Exercise 2: Define why the customer wants to invest in a project
- Exercise 3: Assess the level of complexity of a project
- Exercise 4: Collect some high-level requirements
- Exercise 5: Prioritize requirements
- Exercise 6: Define who would be the most appropriate people to fit some key roles
- Exercise 7: Determine the level of readiness to use an agile way of working
- Exercise 8: Develop a releases plan
- Exercise 9: Develop a Product Backlog
- Exercise 10: Groom a Product Backlog
- Exercise 11: Define quality criteria for a product
- Exercise 12: Carry out a retrospective

Documentation

- Official PRINCE2 Agile® courseware included

Exam

This course prepares candidates to pass the PRINCE2 Agile® Practitioner exam (included in the price)

- This examination is a 50 scenario-based multiple-choice questions
- Lasts 2 hours 30 minutes
- Passing score is 60%
