

## Excel – Fundamentals

### Description

#### The Power of Excel in Your Daily Activities with Our Excel Training

Microsoft Excel is a tool from the Microsoft Office Suite that offers its users a wide range of functions for data calculation and visualization. (Re)discover the fundamental basics of using Excel, from the tool's graphical interface to the creation of tables and graphs that are both aesthetically pleasing and effective.

This training will help you understand how to use Microsoft Excel in your daily activities by showing you how to create simple tables, perform basic calculations, use sorting functions, and ultimately create charts.

#### We guide you in mastering Excel, helping you gain independence.

This one-day training will teach you how to use Microsoft Excel to create tables, sort them efficiently, and perform simple calculations.
